2.	On 23 April, 15 jet fighters with swept-back wings were counted in the northwestern corner of the taxiway. Flying started at 7:30 p. m. and still continued at 8:30 p. m. Four jet fighters took off individually at intervals of about 2 to 3 minutes, flying one large circle over the field then landed. After landing the planes taxied to the dispersal area and four other jet fighters took off. Their wing tips, tail, and the extended landing gears together with the nose wheel had lights.

	sides. These guy wires were interconnected four times by insulated chains. There was a sphere on top of the mast. Another tent was south of the eastern approach lane. There was a closed truck next to it. A radio truck with an extended whip antenna was parked at the dispersal area.							
5.	5. Local residents said that the new unit arrived at the field on 14 April and that the army unit previously stationed there left on the night of 20 April. (3) It was conspicuous that no Soviet Army personnel were seen at the field and that the parking places previously occupied by the Soviet Army vehicles were vacant. (4)							
	Comments.							
(1)	The two fighter regiments, previously stationed in Zerbst, are now believed to be located in Koethen.	25X ²						
(2)	venicles probably belong to the ground units of the fighter regiments. The mast in the eastern extension of the runway was probably the inner landing beacon. For arrangement of lighting facilities, and other data, see							
(3)	Zerbst airfield was evacuated on 6 April 1951. According to another source, one of the two fighter regiments provided	25X1						
(4)	stationed in Zerbst was observed in Koethen on 12 April 1951. The Soviet Army troops previously stationed at the field probably belong to the 7th Cds Tank Div. They were transferred to Letzling Heath in the middle of April 1951.	25X1
